Product Information

D894 High Solids Clear (California)

Product Description

D894 High Solids Clear is a premium quality high solids clearcoat specifically formulated to give optimum gloss and durability.

D894 is designed for use over Global BC Colour (see Data Sheet EU02).

Preparation of Substrate

In all cases, wash all surfaces to be painted with soap and water, then apply the appropriate Global cleaner. See GLG-142 Global Cleaners bulletin for selection and usage instructions. Ensure that the substrate is thoroughly cleaned and dried both before and after application work.

Wet sand with European P800-1200 / U.S. 500-600 grade paper or dry sanding with European P600-800 / U.S. 400-500 grade paper.

Wash off residue and dry thoroughly before recleaning with appropriate Global substrate cleaner. The use of a tack rag is recommended.

Apply Global BC Colour over original stoved finishes or over recommended Global Primers. See Data Sheet EU02 for Global BC system application details.

Performance Guidelines:

Allow the Global BC Colour to flash off for 15 minutes (but no longer than 24 hours) before applying D894 Clear. The timing will depend on thickness and temperature.

Recoating times will be extended at lower temperatures. Global D894 may be sanded with 1200 grit paper or finer and polished when hard, to rectify minor imperfections.

Fading Out - D894 Clear After spot repairing, clean the gun and then spray Global Blending Thinner D853 around the repaired area to lose the edge and blend the repair into the surrounding panel. Spray starting from the outside of the repair, moving to the center.

Technical Data:

Total dry film build

Minimum	50µm / 2.0 mils
Maximum	75µm / 3.0 mils
